

VERSION 6

To test on Live Website. make sure can hit these points:

Admin add need (dall) (dh)(dds)(fd)

edit the existing needs with edit button (daii) (dh)(dds)(fd)

admin nav fixed so doesn't go to next row (daii) (dh)(dds)(fd)

check that the table headers are updated (daii) (dh)(dds)(fd)

check on temp side to see if they can see the needs. (daii) (dh)(dds)(fd)

check mobile bug (daii)(dh)(dds)(fd)

when temp req a job see if counts on admin reply col and new in db w/cell (daii)(dh)(dds)(fd)

check to see that when temp requests info it is the correct timezone (daii)(dh)(dds)(fd)

check to see if emails come through both parties (daii)(dh)(dds)(fd)

click admin reply link. check to see if the replies for the same job (daii)(dh)(dds)(fd)

hit go back button. make sure 'new' changes to 'seen'. in db and on page (daii)(dh)(dds)(fd)

and then archive. look at db (daii)(dh)(dds)(fd)

keep record of all jobs with Y/N

edit button for jobs with success msg

admin nav fixed so doesn't go to next row

added response section in admin page including replies column with number of replies.

refresh shows new request in admin section. changed the temp side to enter 'new' into a new column in db called 'status'. when admin clicks view replies it changes the status to seen.

added 1hour to now() on temp side in all php pages(webhosting pad wouldn't allow eastern tz)

fixed the mobile bug of reloading page and to keep it beingr reloaded
